

LFC-41 Tote

With Fully Laminated Depth Liner

End use

As an alternative to HPT-41, our innovative LFC-41 Tote has proven bulge resistance and stacking strength and uses a high-caliper L flute in both the outer and the doublewall laminated liner.

Because larger flutes mean more top to bottom compression, this state-of-the-art design allows us to compete with the compression strength of three-ply HPT-41 with two-ply construction.

While providing superior strength, the LFC-41 offers cost savings over traditional frozen food totes.

Features

- High caliper L flute outer and LC doublewall inner laminated construction for strength
- Manufactured with flaps backfolded to minimize shipping cost and increase load unit stability
- Multiple sesame tape around the perimeter to reduce tear and bulge
- Water-resistant adhesive ensures superior performance
- Top flaps overlap by 4 inches eliminating the need for a cap
- Optional 2 color printing is available
- **Inventory item – ready for immediate shipment**
