

Solid Fibre Slip Sheets

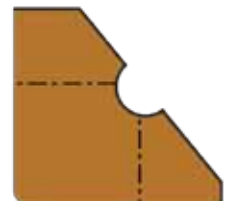

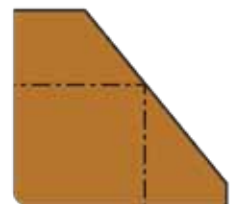

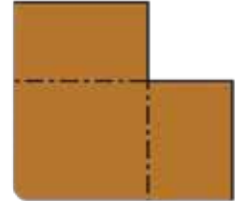

End use

Our solid-fibre slip sheets and push pull sheets offer significant cost and space savings over wood pallets, plastic pallets and plastic slip sheets. Featuring a flat sheet of solid fiber or corrugated board with tabs on one or more sides, Longview slip sheets can be used as a base for assembling, storing, handling or transporting goods as a unit load.

Longview is the only manufacturer of solid-fibre slip sheets in the Northwest.

Features

- Innovation: poly coating and in-line die cutting
- Safer: Less weight for handling
- Sustainable: 100% recyclable and reusable
- Lightweight: Increase truck and rail payloads
- Economical: Up to 90% savings over the cost of a wood pallet
- Space saving: 60 slip sheets equal the height of one wood pallet
- Available sheet sizes up to 66" x 154"

Grade	Max Load (lbs.)	CD Tensile (pli)	Caliper/Thickness
F-84	1062	79.60	.0214
F-112	1508	113.1	.0288
F-126	1665	124.9	.0321
F-140	1898	142.2	.0358
F-168	2364	177.3	.0432
F-207	2815	211.1	.0540
F-224	3290	246.7	.0576
F-280	4112	308.4	.0720
F-450	7024	526.8	.1200

Corner Configuration Examples

Note: Dotted lines are scores (folds), solid lines are cuts.
